Comments:

- 1) The preshow music has been changed and this has really helped with the atmosphere in the room preshow – audience much more relaxed and happy to chat about any headset issues.
- 2) Preshow a blackout was added for the end of the show, but the screens also need to fade out on this cue – added to the list of edits needed.
- 3) Screen number 16 stopped working during the audience entering. Tried to troubleshoot but this screen is on a corner so asked the audience member to share with the person next to her.
- 4) A few of the chairs (12/13/14) were very squeaky during the show, which we will try and sort over the next few days.
- 5) Ms Parr missed the line “Sunday morning I got up and watched cartoons, around 5am.” and in turn the audio reply “Two hours earlier than normal” was skipped to the next cue for Fiona’s reply to Ms Parr’s next line.
- 6) New VR headsets have been ordered from VR Hire (to act as spares as the connectors aren’t very reliable and can slip out). These will arrive today (Monday).
- 7) There were multiple audience members with their hands up during the opening instruction videos with various issues including – straps on the headsets and loss of connection with the wifi. These were all resolved within 3 minutes.
- 8) No audience members had problems with the VR headsets during the performance.

Many Thanks
